

# Town of Hay River Protective Services Town of Hay River EMO Update

May 9, 2021 Breakup Report 1130 Hours

Breakup is still underway, with levels at Sousa Creek, Chinchaga River, and Steen still rising. The Border has leveled off, but the level is still high in that area. Local levels are still very high, and some sites show record highs as far as depth is concerned.

There is ice flowing through Paradise Gardens, and the ice was still in place in the gorge in the Enterprise area.

To summarize, we still have high water throughout the system, and both the East and West Channels are jammed. There was an increase in water level at the forks between the two channels, and still more water and ice to come.

The Evacuation Order is still in effect. For those of you affected by it, we thank you for your patience. We will lift the order as soon as it is safe for us to do so.

Your EMO team is keeping a very close eye on the situation, and we will continue to keep you apprised of any issues as things change, for better or worse.
