

Save Water

Lower your bills and reduce your environmental footprint by reducing your water consumption.

Water conservation

- Use a timer to take shorter showers.
- Use an ENERGY STAR® certified dishwasher instead of washing by hand (and only wash full loads).
- Don't let the faucets run (such as when brushing your teeth).
- Take a shower instead of a bath.
- Find and fix any plumbing leaks.
- When doing laundry, only wash full loads.
- If you water your lawn, do so only when it needs watering.
 - Deep soak your lawn instead of giving it a light sprinkle.
 - Water in the early morning when it's cool.
 - Set the sprinkler so it only waters the lawn, not the road or sidewalks.

Water efficiency

- Install low-flow plumbing fixtures:
 - Toilets.
 - Showerheads.
 - Faucets or aerators.
- Buy an ENERGY STAR certified washer.
- Replace your dishwasher with an ENERGY STAR certified model.
