

Public Works Notice:

Residents and businesses on the piped water system in Hay River

Please be advised that the Town is experiencing an unusual amount of water line freeze ups due to deeper than normal ground frost levels.

Public Works is working with local contractors to ensure that service is returned as quickly as possible. These issues will likely continue as we move through spring.

To prevent the possibility of freeze ups a good practice of running your cold water tap for 2-3 minutes throughout the day will help. Also if you plan on being out of town or on vacation advise anyone checking on your homes to do the same daily.

2022/2023 Business License Renewal

Notice

The 2021/2022, Town of Hay River business licenses will expire **March 31, 2022.**

Mayor's Message:

The month of April is such a time of transition in the North, particularly this year. On March 18, 2020, the lives of all northerners changed with the issuance of an Emergency Health Order. Today the emergency measures in the NWT have been removed. I know we are all thankful and excited to see our daily lives return to some sense of normality.

In writing these monthly letters I am always interested to find facts about a month. For example, the meaning of April is rooted in the Latin April's, meaning "to open". How appropriate as our society begins to open.

We have learned much over the last two years, both good and bad. While we have seen our community, for the most part, come together in unison to support the measures from Public Health it has also laid bare some of the social issues that afflict our community.

The Town of Hay River convened a meeting of the former Inter-agency Group in the month of March. During this meeting it was confirmed that the Town of Hay River would take the lead in chairing this group to address the concerns of the community as they relate to illegal drugs. I will keep the community informed as we work with the various stakeholders to identify solutions.

our Town Council and management team have just concluded their strategic planning session this last weekend. Once the document is complete, I will share with the community. Your Town Administration and staff have already begun planning for this year's spring breakup. We will, as always keep the community informed as breakup progresses.

In closing let's be grateful that life is returning to normal, however lets also be mindful that Covid has not disappeared

-Mayor Kandis Jameson

| • Commercial or business waste | • Light Bulbs |

****PLEASE ORGANIZE WASTE SO THAT IT MAY BE COLLECTED EASILY****

DO NOT MIX METAL WITH BRUSH OR GARBAGE, IF IT IS MIXED WE WILL

NOT PICK UP**

Speed and Time

One of these things is easier to come by in the morning, and we all know it isn't time. Some days, life with children can be challenging and you can find yourself behind schedule. But please keep in mind that speeding through a school zone is not an effective way to make up for lost time. Below, there are some charts of stopping distances on dry and wet pavement. The average car is about 15 feet long and the average truck is around 20 feet long. These are average stopping distances that do not include icy conditions. The largest continuous school zone driven is approximately 500 meters long. Immediately below, you can see how long it takes to drive this section going each respective speed.

20km/hr 1 minute 30 seconds

30km/hr 1 minute

40km/hr 45 seconds

Vehicle Stopping Distance by Speed, Dry Asphalt

Speed (km/h)	Distance (ft)		
	Thinking	Braking	Total
10	9	1.5	10.5
20	18	6.5	24.5
30	27	14.5	41.5
40	36	25	61

Vehicle Stopping Distance by Speed, Wet Asphalt

Speed (km/h)	Distance (ft)		
	Thinking	Braking	Total
10	9	3	12
20	18	13	31
30	27	29	56
40	36	51.5	87.5

So please keep in mind to stay below the speed limit in school zones, and keep your speed slower so it's safer to stop for unexpected reasons. The safety of your children and your neighbors' children are at risk.

Thank you and have a safe day!
