

Fire Safety!

Campfires, Outdoor Adventures and BBQ Season are the hottest things this season... besides the Sun that is ☺

Everyone wants to get out and enjoy the outdoors when it's warm out, and we want you to enjoy it as well!

We just ask that you please follow all local fire regulations! Having an approved fire pit during fire ban periods still requires some caution. Here are a couple tips to help keep you fire safe. It's always a good idea to keep flammable objects at least 3 feet away from your fire pit and always have a water supply appropriate to the size of fire available. Always remember to make sure the fire is completely out before you leave. If it still smokes when you pour water on it, it's not out!
