

## Public Notice

### Hay River Breakup Update

April 25, 2023 – 5pm

Water levels on the Hay River within the NWT have started to marginally rise locally. Rising water is causing local ice separation and consolidation including near Mile 5 and Smiths Trail to Delancey Estates. We will see temperatures stay above freezing in Southern NWT over the next several days and warming into the weekend.

Hay River residents should this week follow flood preparedness recommendations distributed by the Town of Hay River. Preparedness information can also be found at [www.hayriver.com/breakup](http://www.hayriver.com/breakup).

Updates will follow as conditions change.

*Mile 5 / Homesteaders Area*

*Between Smith Trail and Delancey Estates*
