Hay River Breakup Update

May 1, 2023 – 10:00AM

Ice is consolidated a bit further in the east channel. Water levels have dropped from the south as the last of the ice has arrived. The ice that did arrive was pushed out of the west channel. Crews are waiting for the east channel to clear and will continue to monitor. The risk of flooding remains low.

Hay River residents should follow flood preparedness recommendations distributed by the Town of Hay River. Preparedness information can also be found at www.hayriver.com/breakup.

The next update will be at 5:00PM on Monday, May 1, 2023, at 5:00PM or as conditions change.
